PROFESSIONAL SUMMARY

Frontend Engineer with 4 years of experience, specializing in building high-performance E-commerce and Real Estate platforms. Proficient in developing scalable frontend systems and managing complex data flows for large-scale applications with 60,000+ listings. Dedicated to writing clean, maintainable code with a strong focus on modular component design, optimizing Core Web Vitals, and delivering seamless user experiences (UX) alongside intuitive, visually appealing user interfaces (UI) that align with business goals.

EXPERIENCE

SUMVIET TECHNOLOGY Co. LTD

Jun 2022 – Present

Frontend Engineer

- **Real Estate - Integrated PropTech Ecosystem**

- **Description:** Developed a large-scale PropTech platform managing 60,000+ property listings, featuring digitized appraisal workflows and integrated HRM solutions for internal operations.
- **Responsibilities:**
 - Developed and maintained a scalable frontend structure, managing complex data flows across Listing, HRM, and Appraisal modules using Redux Toolkit.
 - Optimized the performance of 60,000+ property listings through SSR, Server-Side Pagination, and Strategic Preloading, ensuring high responsiveness and optimal Core Web Vitals scores.
 - Developed a shared component library to standardize UI patterns and improve development consistency across projects.
 - Integrated an advanced RBAC (Role-Based Access Control) system to ensure secure and personalized user experiences for multiple internal roles.
- **Technologies:** React, Next.js, Redux Toolkit, Tailwind CSS, PHP, SQL, Schema.org

- **E-commerce (Outsource Projects)**

- **Description:** Modernized UX/UI for large-scale E-commerce platforms (PrestaShop, Sylius) and integrated AI-driven features to enhance digital shopping experiences.
- **Responsibilities:**
 - Modernized legacy frontend interfaces on PrestaShop and Sylius platforms.
 - Translated business requirements into responsive and maintainable frontend features.

- Built interactive UI for AI-powered chat and support systems integrated with backend AI services.
- Improved frontend stability and UI consistency across multiple client projects.
- Collaborated closely with backend developers to optimize API usage and data flows.
- **Technologies:** React, Zustand, TypeScript, Shadcn/ui, DaisyUI

Codosa Holding JSC

Jun 2020 – Apr 2022

Frontend Engineer

• Pawnshop Platform

- **Description:** Developed a fintech platform enabling asset appraisal, loan applications, repayment tracking, and liquidation e-commerce features.
- **Responsibilities:**
 - Built loan tracking and repayment interfaces with real-time status updates.
 - Developed asset appraisal and loan application flows with validation and error handling.
 - Implemented e-commerce features for purchasing liquidated assets.
 - Integrated Google Maps services to locate nearby branches.
 - Ensured responsive design and cross-browser compatibility.
- **Technologies:** React, Redux Toolkit, Ant Design, SCSS, ExpressJS, MongoDB

EDUCATION

Bachelor of Software Engineering

Sep 2017 – Jan 2020 | HCM, VN

FPT Polytechnic

SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3/SCSS, PHP (Basic).
- **Frontend:** React, Next.js, JQuery, Zustand, Redux Toolkit, React Query.
- **UI & Styling:** Tailwind CSS, Shadcn/ui, DaisyUI, Ant Design, Bootstrap.
- **API & Communication:** RESTful APIs, WebSockets, GraphQL, JSON.
- **Animation & Interaction:** GSAP, Framer Motion.
- **AI Integration:** LLM Integration (OpenAI, Gemini API), Chatbot Interface Development, RAG Integration basics (LlamaIndex, Ollama).
- **Testing:** Jest, React Testing Library (Unit & Integration Testing).
- **Technical Ecosystem:** Familiar with Backend development (Node.js, PHP, SQL/NoSQL) and DevOps tools (Vercel, GCP, GitLab CI/CD, GitHub Actions).
- **Methodology:** Agile/Scrum, SDLC Management via Jira, GitLab, GitHub.
